PROJECTS

WhatsApp Chat Analyzer | [GitHub](#) | [Live Link](#)

- Developed an interactive chat analysis tool using Python and Streamlit, enabling users to derive meaningful insights from WhatsApp chat logs, including top statistics, message trends, and communication patterns.
- Implemented advanced data visualization features such as word clouds, heatmaps, and sentiment analysis, enhancing user engagement and providing clear insights into chat activity.
- Delivered real-time, accessible analysis via a live Streamlit app, offering users a seamless experience for exploring communication patterns across individual and group chats.
- Technologies Used:** Python, Streamlit, Pandas, Matplotlib, Seaborn

Café Insights: Sales Dashboard | [GitHub](#)

- Designed an advanced, fully dynamic Power BI dashboard for a coffee shop, featuring SQL-integrated data and custom DAX functions to deliver real-time insights, including KPIs, sales trends, and product performance analysis.
- Utilized interactive visualizations such as custom charts, calendar heatmaps, and spark lines to provide a comprehensive view of sales metrics, enhancing data-driven decision-making for sales growth and customer trend analysis.
- Technologies Used:** Power BI, SQL
